Summary

Global Markets Direct’s latest Pharmaceutical and Healthcare disease pipeline guide Eosinophilic Esophagitis - Pipeline Review, H1 2018, provides an overview of the Eosinophilic Esophagitis (Gastrointestinal) pipeline landscape.

Eosinophilic esophagitis is disease characterized by the presence of a large number of a special type of white blood cell, the eosinophil that can cause inflammation in the esophagus. Symptoms include poor weight gain, abdominal pain, nausea, and vomiting, coughing, heartburn and chest pain. Risk factors include weakened immune system, chemotherapy, aspirin and anti-inflammatory medications, chronic vomiting, obesity and alcohol and cigarette use. Treatment includes antiviral, antifungal and pain relievers.

Report Highlights

Global Markets Direct’s Pharmaceutical and Healthcare latest pipeline guide Eosinophilic Esophagitis - Pipeline Review, H1 2018, provides comprehensive information on the therapeutics under development for Eosinophilic Esophagitis (Gastrointestinal), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Eosinophilic Esophagitis (Gastrointestinal) pipeline guide also reviews of key players involved in therapeutic development for Eosinophilic Esophagitis and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase III, Phase II, Preclinical and Discovery stages are 1, 4, 3 and 1 respectively.

Eosinophilic Esophagitis (Gastrointestinal) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct’s proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Eosinophilic Esophagitis (Gastrointestinal).
- The pipeline guide reviews pipeline therapeutics for Eosinophilic Esophagitis (Gastrointestinal) by
companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.
- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Eosinophilic Esophagitis (Gastrointestinal) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Eosinophilic Esophagitis (Gastrointestinal) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Eosinophilic Esophagitis (Gastrointestinal)

Reasons to buy
- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Find and recognize significant and varied types of therapeutics under development for Eosinophilic Esophagitis (Gastrointestinal).
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying key players and it’s most promising pipeline therapeutics.
- Formulate corrective measures for pipeline projects by understanding Eosinophilic Esophagitis (Gastrointestinal) pipeline depth and focus of Indication therapeutics.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.
- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Shire Plc

License Types:

Single User License (PDF)

- This license allows for use of a publication by one person.
- This person may print out a single copy of the publication.
- This person can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
- This person cannot share the publication (or any information contained therein) with any other person or persons.
- Unless a Enterprise License is purchased, a Single User License must be purchased for every person that wishes to use the publication within the same organization.
- Customers who infringe these license terms are liable for a Global license fee.

Site License (PDF)*

- This license allows for use of a publication by all users within one corporate location, e.g. a regional office.
- These users may print out a single copy of the publication.
- These users can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
- These users cannot share the publication (or any information contained therein) with any other person or persons outside the corporate location for which the publication is purchased.
Unless a Enterprise License is purchased, a Site User License must be purchased for every corporate location by an organization that wishes to use the publication within the same organization. Customers who infringe these license terms are liable for a Global license fee.

Global License (PDF)*

- This license allows for use of a publication by unlimited users within the purchasing organization e.g. all employees of a single company.
- Each of these people may use the publication on any computer, and may print out the report, but may not share the publication (or any information contained therein) with any other person or persons outside of the organization.
- These employees of purchasing organization can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
